Deception Network

E2E Validation — Weekly Security Activity Report

Period: 2026-10-20 01:42 to 2026-10-27 01:42 (UTC)

Generated: 2026-10-27 01:42:51 (UTC)

Scope: Cowrie, OpenCanary and SMB honeypot telemetry

115
Events in period

170
Total stored events

3
Unique source IPs

16
Analyzed sessions in period

1. Executive summary

This report summarizes honeypot telemetry and associated security analysis for the selected reporting period.

- 2 event source(s) recorded activity in the period.
- 0 globally routable source IP(s) were observed.
- 2 completed Cowrie file-transfer event(s) were recorded.
- 2 threat-intelligence result(s) are available for eligible indicators observed during the period.

> **Data limitation:** No globally routable source IPs were observed in this period. The recorded source IPs are private, local or otherwise non-global, so public IP reputation lookups were not performed.

2. Activity by source and protocol

Event sources

Source	Events
cowrie	94
opencanary	21

Protocols

Protocol	Events
ssh	66

Protocol	Events
telnet	28
smb	19
http	1
ftp	1

Most frequent event types

Event type	Events
opencanary.smb.audit	19
cowrie.session.connect	16
cowrie.session.closed	16
cowrie.command.input	15
cowrie.telnet.option	9
cowrie.login.success	6
cowrie.session.params	6
cowrie.log.closed	6
cowrie.client.version	5
cowrie.client.kex	5
cowrie.command.failed	5
cowrie.client.size	3

Activity by honeypot and protocol

Honeypot / sensor	Protocol	Events	Unique source IPs	Most frequent event types
Cowrie	SSH	66	3	cowrie.command.input (11); cowrie.session.connect (10); cowrie.session.closed (10)
Cowrie	Telnet	28	3	cowrie.telnet.option (9); cowrie.session.connect (6); cowrie.session.closed (6)
OpenCanary	FTP	1	1	opencanary.ftp.login_attempt (1)
OpenCanary	HTTP	1	1	opencanary.http.get (1)
OpenCanary SMB audit (Samba share)	SMB	19	1	opencanary.smb.audit (19)

Event types shown here are recorded telemetry, not a conclusion that an attack succeeded.

Representative HTTP, FTP and SMB activity

Selected service interactions are shown below. Duplicate details are collapsed, and full internal SMB filesystem paths are not exposed.

Recorded OpenCanary service events: 21

Time (UTC)	Honeypot	Protocol	Source endpoint	Destination port	Event type	Observed activity
2026-10-24 19:53:58	OpenCanary SMB audit (Samba share)	SMB	192.168.56.1	445	opencanary.smb.audit	SMB audit; action=disconnect; share=decoyshare; status=ok; item=decoyshare
2026-10-24 15:18:17	OpenCanary SMB audit (Samba share)	SMB	192.168.56.1	445	opencanary.smb.audit	SMB audit; action=close; share=decoyshare; status=ok; item=network_inventory.txt
2026-10-24 15:18:17	OpenCanary SMB audit (Samba share)	SMB	192.168.56.1	445	opencanary.smb.audit	SMB audit; action=close; share=decoyshare; status=ok; item=(share root)
2026-10-24 15:18:17	OpenCanary SMB audit (Samba share)	SMB	192.168.56.1	445	opencanary.smb.audit	SMB audit; action=fget_dos_attributes; share=decoyshare; status=fail (No data available); item=network_inventory.txt
2026-10-24 15:18:17	OpenCanary SMB audit (Samba share)	SMB	192.168.56.1	445	opencanary.smb.audit	SMB audit; action=fgetxattr; share=decoyshare; status=fail (No data available); item=network_inventory.txt
2026-10-23 20:39:44	OpenCanary	FTP	192.168.56.1:58026	21	opencanary.ftp.login_attempt	OpenCanary observed FTP login activity; credentials omitted
2026-10-23 20:20:04	OpenCanary	HTTP	192.168.56.1:62885	8081	opencanary.http.get	HTTP GET /index.html; recorded input=/index.html

3. Source IP activity

Source IP	Classification	Events
192.168.56.1	Private/local/reserved	103
127.0.0.1	Private/local/reserved	8
172.30.10.3	Private/local/reserved	4

4. Geographic context

No country attribution is available for the selected period. The report does not infer attacker countries from private IP addresses.

5. Authentication activity

Passwords are never included in this report. Usernames below are drawn from recorded login-related events; an event's presence does not by itself prove that the credentials were valid.

Username	Recorded login-related events
labssh	5
ftp-lab-check	1
telnetlabtelnetlab	1

Distinct credential pairs tracked to date: **8**.

6. Behavioral analysis

Sessions are grouped using command-family and TTP similarity heuristics. A cluster is not proof of a shared attacker or campaign.

Cluster	Sessions	Protocols	Commands categorized	Behavior families
INSUFFICIENT_DATA	13	ssh, telnet	5	file_transfer, host_discovery, other, session_end
CL-7136814d	3	ssh, telnet	10	host_discovery, session_end, file_discovery

Latest clustering analysis timestamp: 2026-10-27T01:42:49+00:00

7. Representative command activity

Command-related events with recorded input during the reporting period: **20**. The table shows up to 12 distinct recent command examples rather than every routine command.

Common credential-like arguments and URL query strings are redacted where recognized. This is a best-effort redaction, so review the private report before sharing it.

Time (UTC)	Honeypot	Protocol	Source IP	Session	Activity	Sanitized command preview
2026-10-27 01:28:13	Cowrie	SSH	192.168.56.1	d725a52785d1	Command input	exit
2026-10-27 01:28:10	Cowrie	SSH	192.168.56.1	d725a52785d1	Command input	ls
2026-10-27 01:28:09	Cowrie	SSH	192.168.56.1	d725a52785d1	Command input	pwd
2026-10-26 19:10:34	Cowrie	SSH	192.168.56.1	98cc182fad81	Command input	scp -t /tmp/eicar.com.txt
2026-10-26 18:23:17	Cowrie	SSH	192.168.56.1	2ad19b8be06c	Command input	scp -t /tmp/sample.txt
2026-10-26 18:20:29	Cowrie	SSH	192.168.56.1	094f647f399c	Failed command	Set-Content :USERPROFILE\honeypot-test\sample.txt
2026-10-26 18:20:29	Cowrie	SSH	192.168.56.1	094f647f399c	Failed command	Deception Network file-upload validation
2026-10-26 18:20:29	Cowrie	SSH	192.168.56.1	094f647f399c	Command input	"Deception Network file-upload validation" | Set-Content "$env:USERPROFILE\honeypot-test\sample.txt"
2026-10-26 18:20:29	Cowrie	SSH	192.168.56.1	094f647f399c	Failed command	Out-Null
2026-10-26 18:20:29	Cowrie	SSH	192.168.56.1	094f647f399c	Failed command	New-Item -ItemType Directory -Force :USERPROFILE\honeypot-test
2026-10-26 18:20:29	Cowrie	SSH	192.168.56.1	094f647f399c	Command input	New-Item -ItemType Directory -Force "$env:USERPROFILE\honeypot-test" | Out-Null
2026-10-24 14:21:30	Cowrie	SSH	192.168.56.1	84a6326db7f6	Failed command	exot

8. File artifacts and malware intelligence

Completed Cowrie file-transfer events in this period: **2**.

Distinct SHA-256 hashes observed in those events: **2**.

New file hashes registered by the tracker during this period: **2**.

SHA-256	Transfer events	VirusTotal analysis	Last checked (UTC)
275a021bbfb6489e54d471899f7db9d1663fc695ec2fe2a2c4538aabf651fd0f	1	Malicious: 56; suspicious: 0; harmless: 0; undetected: 4; name: eicar.com-27998	2026-10-26T19:15:51+00:00
5084d2a46c182641e833b8cdf049ae9a946444511bf4677079c26781fe678c1f	1	No existing VirusTotal file report	2026-10-26T18:26:39+00:00

Provider findings reflect the latest available analysis for each captured file hash. A detection count is not, by itself, a complete malware verdict.

9. Threat intelligence

Indicator type	Observed indicator	Provider	Status	Assessment	Last checked (UTC)
file_hash	275a021bbfb6489e54d471899f7db9d1663fc695ec2fe2a2c4538aabf651fd0f	VirusTotal	ok	Malicious: 56; suspicious: 0; harmless: 0; undetected: 4; reputation: 3802	2026-10-26T19:15:51+00:00
file_hash	5084d2a46c182641e833b8cdf049ae9a946444511bf4677079c26781fe678c1f	VirusTotal	not_found	No matching record was found.	2026-10-26T18:26:39+00:00

10. Alerting status and limitations

New credential alerts recorded during this period: **1**.

Alert time (UTC)	Observed time (UTC)	Source	Protocol	Username	Event type	Fingerprint prefix	Status
2026-10-27 01:27:59	2026-10-27 01:27:59	cowrie	ssh	labssh	cowrie.login.success	613ecaf572	new

- Credential-pair tracking uses keyed fingerprints; plaintext passwords are not retained.
- File analysis is based on captured file-transfer artifacts and available provider findings.
- Source-IP reputation findings are shown only for eligible observed indicators.
- Credential-alert history begins when persistent alert tracking was introduced; earlier console alerts are not automatically backfilled.
